EDUCATION

Goldsmiths, University of London

London, UK

Bachelor of Science in Computer Science

Graduation: Estimated Sep 2026

Concentrations: Backend Development, Database Design, Artificial Intelligence & Machine Learning, Game Development

TECHNICAL SKILLS

Programming Languages : C#, HTML, CSS, Python, Java, TypeScript, JavaScript, SQL, C++, HTML

Frameworks/Libraries : .NET, ASP.NET Core, ASP.NET MVC, ABP Framework, ReactJS, Blazor, Next.js, Django, PyBullet, NumPy, Pandas

Tools : Git, Docker, AWS, PostgreSQL, SQLite, Unity, Godot, Jira, Linear

PROFESSIONAL EXPERIENCE

Quick & Quality

Kayseri, TR

ProjectHR – HR Management Platform

Kayseri, TR

Backend Developer / Team Lead

October 2025 – Present

- Selected as **Backend Team Lead** for the new ProjectHR initiative due to strong architectural understanding and technical leadership.
- Lead a backend team of 3 developers, planning sprints, conducting code reviews, and coordinating feature delivery.
- Designed and implemented a multi-tenant HR platform using **.NET 9, ABP Framework, PostgreSQL, and Docker**.
- Implemented core modules including annual leave management, approval chains, organizational units, onboarding flows, and transfer policies.
- Improved codebase maintainability by restructuring domain modules and enforcing clean architecture boundaries.
- Designed relational data models and enforced referential integrity using EF Core.
- Managed Docker-based development environments, migrations, and onboarding documentation for backend developers.

Backend Intern

May 2025 – October 2025

- Supported development of internal HR and operations tools using **.NET** and **PostgreSQL**.
- Implemented and debugged REST API endpoints for employee workflows and leave management systems.
- Assisted with database migrations and Docker-based local development workflows.
- Collaborated with senior developers while learning code review processes, Git workflows, and CI/CD practices.

PROJECTS

BigKobi – Business Support & Grant Discovery Platform

Personal / Professional Project

Sole Backend Developer

2026 – Present

- Built an enterprise-grade platform helping Turkish SMEs discover and apply for government grants including **KOSGEB** and **TÜBİTAK**.
- Developed the backend using **.NET 9, ABP Framework, PostgreSQL, and Docker**.
- Designed and implemented 15+ business domains including grant management, B2B negotiation tracking, payment processing (**lyzipay**), referral systems, and conditional eligibility questionnaires.
- Applied **Domain-Driven Design** principles including aggregates, repositories, and domain services within a layered ABP architecture.
- Implemented multi-tenant organization support and claim-based authorization using **OpenIddict OAuth2/OIDC**.
- Integrated AWS services including **S3, SES, Secrets Manager, and ECR** for storage, email delivery, deployment, and secure configuration management.
- Authored Docker configurations and GitHub Actions CI/CD pipelines for automated deployments to AWS infrastructure.

ProjectHR – HR Management Platform

Kayseri, TR

Backend Developer / Team Lead

2025 – Present

- Built a modular HR platform using **.NET 9, ABP Framework, and PostgreSQL** with multi-tenant architecture.
- Implemented modules including annual leave rules, organizational units, approval workflows, and onboarding systems.
- Designed and documented RESTful APIs following clean architecture and domain-driven design principles.
- Managed Docker-based development environments and migration workflows for the backend team.

LEADERSHIP AND ACTIVITIES

Member : English Speaking Club (online / Instagram community)

Dungeon Master : Run long-term D&D campaigns involving custom encounters, homebrew monsters, and narrative-driven world-building.
